INTERNSHIPS

Mern Stack Intern	2025
Completed a MERN Stack Internship during my semester break, where I learned to design and develop full-stack web applications using MongoDB, Express.js, React, and Node.js. Built and deployed a website, gaining hands-on experience in both frontend and backend development, as well as application deployment and hosting.	

PROJECTS

AI-Based Notes-to-Mind Map Generator Python, Google Colab	2025
Developed an AI-based system that extracts key concepts from documents using NLP and automatically generates visual mind maps, enabling efficient note summarization and better understanding of complex information.	
Online Healthcare Platform & Virtual Consultation System (Spring Boot & PostgreSQL)	2025
Built a Spring Boot-based healthcare management system that supports appointment scheduling, virtual consultations, and secure role-based access to patient medical records, utilizing REST APIs and PostgreSQL to ensure scalable, reliable, and efficient healthcare data management	
ExportReady – AI-Powered Export Readiness & Market Intelligence Platform	2026
Developed an AI-driven platform for MSMEs to assess export readiness and recommend suitable international markets. The system analyzes product data, provides compliance guidance, and includes a cost-profit simulator along with an AI assistant for export documentation and procedures.
